A, Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA A, Pathway: fatty acid biosynthesis
A, Pathway: fatty acid biosynthesis
C, Superfamily: human acetyl-CoA carboxylase; biotin carboxylase homology; lipoyl/biotin C, Keywords: cytosol; ligase
F, 36-542/Domain: biotin carboxylase homology < BCH>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Introns: 111/3; 180/3; 234/3; 265/3; 297/3; 355/3; 387/1; 449/3; 466/3; 480/1; 521/3;

Coperation: Description acetyl-CoA carboxylase; biotin carboxylase homology; lipoyl/biotin
Coccession: Accession:                                                     C;Function:
A;Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA
A;Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA
A;Pathway: fatty acid biosynthesis
A;Pathway: fatty acid biosynthesis
C;Superfamily: human acetyl-CoA carboxylase; biotin carboxylase homology carboxylase
B;134-640/Domain: biotin carboxylase homology cAPB>
F;767-839/Domain: lipoyl/biotin-binding homology cLPB>
F;806/Binding site: biotin (Lys) (covalent) #status predicted
A;Introna: 69/1; 90/2; 209/3; 278/3; 332/3; 363/3; 395/3; 453/3; 485/1; 547/3;

C; Function:
A; Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA
A; Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA
A; Description: catalyzes the ATP-dependent carboxylase homology; lipoyl/biotin
C; Superally: human acetyl-CoA carboxylase; biotin carboxylase homology cataly
C; Keywords: ligase
F; 41-547/Domain: biotin carboxylase homology cataly
F; 713/Binding site: biotin (Lys) (covalent) #status predicted
                               A;Gene: ACCase-A

A;Note: authors translated the codon GCC for residue 1834 as Ala
A, Experimental source: strain A188; leaf
C, Function:
A, Description: catalyzes the ATP-dependent carboxylation of acetyl-CoA to malonyl-CoA
A, Pathway: fatty acid biosynthesis
C, Superfamily: human acetyl-CoA carboxylase; biotin carboxylase homology; lipoyl/bioti
C, Swpworfamily: human acetyl-CoA carboxylase, biotin carboxylase homology; lipoyl/bioti
P;134-640/Domain: biotin carboxylase homology <B;767-839/Domain: lipoyl/biotin-binding homology <LPB>

probable acetyl-CoA carboxylase (EC 6.4.1.2) biotin carboxylase chain NWA0596 [similar: N; Contains: biotin carboxylase (EC 6.3.4.14)
C; Species: Neisseria meningitidis
C; Species: Neisseria meningitidis
C; Accession: H81978
R; Parkhill, J.; Achtman, M.; James, K.D.; Bentley, S.D.; Churcher, C.; Klee, S.R.; Morr; Holroyd, S.; Jagels, K.; Leather, S.; Moule, S.; Mungall, K.; Quail, M.A.; Rajandrean Nature 404, 502-506, 2000
A; Title: Complete DNA sequence of a serogroup A strain of Neisseria menigitidis 22491.
A; Reference number: A81775; MUID: 20222556; PMID: 10761919
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A;Cross-references: UNIPROT:Q9JW07; UNIPARC:UPI00000C49E5; GB:AL162753; GB:AL157959; A;Experimental source: serogroup A, strain Z2491

Abjorin carboxylase (EC 6.3.4.14) - Anabaena sp. (strain PCC 7120)

NiAlternate names: acetyl-CoA carboxylase (EC 6.4.1.2), biotin carboxylase chain cispecies: Anabaena sp.
C; Species: Anabaena sp.
C; Date: 08-Sep-1995 #sequence_revision 08-Sep-1995 #text_change 09-Jul-2004
C;Accession: A53311

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
